

Electrical full automatic

For eyelets

CHARACTERISTICS

Height : 147 cm

Width : 90 cm

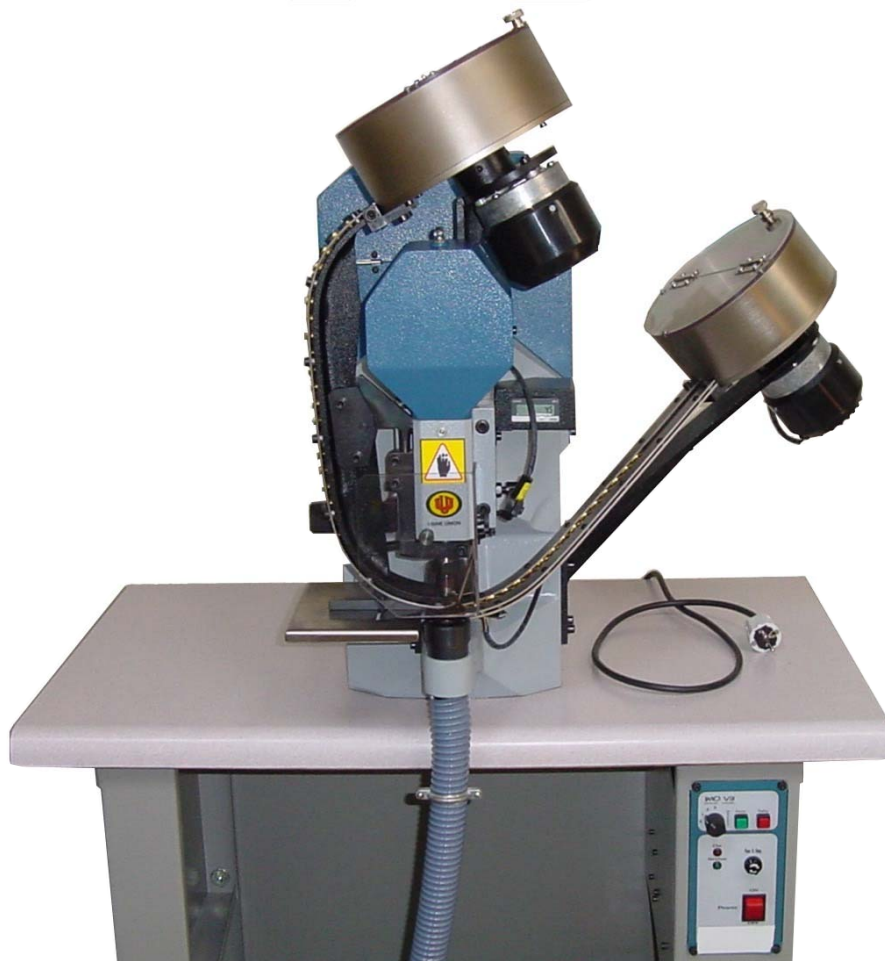

Depth : 68 cm

Weight : 120 kg

Motor : 1 HP

Power : 220/380 V

955 FA

Electrical machine for the automatic distribution of eyelets and washers, with 2 distribution drums. Used for setting eyelets in ready-made clothing, tarpaulin, sails, camping and sports equipment, tents, curtains,

The machine distributes, punches and places eyelet and washer in a single operation.

Two slide ways of large capacity guarantee the distribution of the eyelets and the washers. The machine is equipped with a sensor which avoids placement of an eyelet without a washer, but it is also possible to place an eyelet without a washer.

Equipped with a laser pointer and a counter.

The electronic functions allow a noise reduction and more comfort for the operator.

We have a large range of machines for different applications.
