FULL AUTOMATIC ELECTRICAL MACHINE WITH TWO DISTRIBUTIONS

FOR SETTING RIVETS AND WASHERS

CHARACTERISTICS

Height :141 cm

Width : 90 cm

Depth :64 cm

Weight :134 kg

Motor : 0.75 HP - 220/380 V

Electrical machine for automatic setting of rivets and washers, with two distribution drums. Especially recommended for setting rivets in shoes, bags, cardboard, etc.

The machine distributes, punches and sets the rivet and washer in a single operation.

This machine is equipped with a sensor, which avoids settings of a rivet without the washer. The sound level of this machine is much lower than that of a traditional machine, which improves the task of the operator.

The machine is also equipped with a laser pointer and an operations counter.

We offer a large range of machines with other options.
