FA

AUTOMATIC ELECTRIC EYELETING MACHINE FOR SETTING LARGE EYELETS AND WASHERS (UP TO 16,5 MM HOLE) .

- Punches and sets eyelets and washers in one operation with each action on pedal.
- Orientates the eyelets and washers using hoppers operated by independent motors.
- Powerful cutting action gives positive setting in all types and multiple thicknesses of material.
- Forwards and backwards pulse movement.
- Necked, Toothed and Grommet (Spur) washers can be set automatically and are positively positioned by use of slide mechanism.
- Particularly suitable for applications subjects to stress forces in fabrics, tarpaulins, plastic sheeting or cardboard.
- Saves power, costs and time.

SPECIFICATIONS
